

SHANABOINA NIVAS

B.Tech CSE (AI & ML)

Hyderabad, India | nivasn227@gmail.com | 9542841948

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science Engineering (AI & ML) student with hands-on experience in Python, Java, machine learning, deep learning, and full-stack web development. Skilled in data preprocessing, feature engineering, model development, and building user-focused applications. Experienced through academic projects and internships in developing data-driven and AI-based solutions. Seeking opportunities to apply AI/ML and software development skills to build reliable, scalable products.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming

AI & Machine Learning: Machine Learning, Deep Learning, Data Preprocessing, Feature Engineering

Web Development: HTML5, CSS3, JavaScript, Flask

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib

Database: MySQL, SQLite

Tools & Platforms: Git, GitHub, VS Code, Microsoft Excel

EDUCATION

B.Tech — Computer Science Engineering (AI & ML)

St. Martin's Engineering College, Hyderabad

2023 – 2027

CGPA: 7.73/10

Intermediate

Aryabhatta Junior College, Kamareddy

2023

Percentage: 93.1%

SSC

Zilla Parishad High School (ZPHS), Gunj, Kamareddy

2021

CGPA: 9.7/10

PROJECTS

Product Recommendation System for E-Commerce | *Python, Pandas, Scikit-learn, Flask, ML*

- Developed a machine-learning-based recommendation system to generate personalized product suggestions based on user preferences and purchasing behavior.
- Performed data preprocessing and feature engineering on product and user-interaction data.
- Implemented recommendation algorithms to identify relevant products and improve personalization.
- Integrated the recommendation engine into a Flask web application for user-facing product recommendations.

Stock Price Prediction Using LSTM and ANN | *Python, Deep Learning*

- Developed stock price forecasting models using LSTM and Artificial Neural Network architectures for time-series data.
- Collected and analyzed historical market data to create training and validation datasets.
- Evaluated model performance using prediction metrics and visualization techniques.

StudyBuddy – Learning Management Web Application | *HTML, CSS, JavaScript*

- Developed a student-focused web application for resource sharing and collaborative learning.
- Built interactive interfaces to improve navigation and engagement with study materials.
- Implemented client-side functionality for organizing study content and supporting communication between users.

EXPERIENCE / INTERNSHIPS

Data Science Intern — SkillCraft Technology

May 2026 – Jun 2026

- Developed a Decision Tree classification model using Python and Scikit-learn to predict passenger survival outcomes using the Titanic dataset.
- Performed data preprocessing, missing-value handling, feature encoding, model training, prediction, and accuracy evaluation.
- Conducted exploratory data analysis using Pandas, Matplotlib, and Seaborn to identify patterns in datasets.
- Analyzed traffic accident patterns based on weather conditions, road conditions, and time of day using data visualization and heatmaps.

AI & Machine Learning Intern — Edunet Foundation & AICTE

Jan 2026 – Feb 2026

Java & IT Industry Application Internship — ULS Technologies

Nov 4 – Nov 16, 2024

CERTIFICATIONS

- Foundations of Prompt Engineering** — AWS Training & Certification | 2026
- Artificial Intelligence Fundamentals** — IBM SkillsBuild | 2026
- Edunet – Artificial Intelligence** — IBM SkillsBuild | 2026
- Introduction to Modern AI** — Cisco Networking Academy | 2026
- Introduction to Data Science** — Cisco Networking Academy | 2025
